

Cow flow management

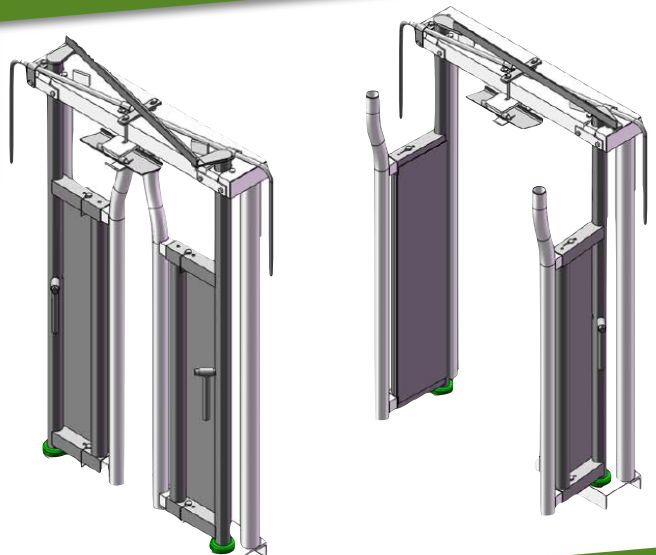

HEAVEY DUTY AND DURABLE

HEAD CATCH

The East Rock Head Catch system is a dependable walk-through gate system that can be utilized for a variety of applications such as artificial insemination, pregnancy checks, and calving. Its components are hot dip galvanized, ensuring its durability and trouble-free use for years to come. This system has quick pins that allow you to secure both mature Holsteins and Jersey cows. Moreover, the neck spacing can be effortlessly adjusted, making it a versatile option.

FEATURES & BENEFITS

- The adjustable neck space offers greater flexibility, can be used for multiple age groups
- Convenient for one person operation
- All components are hot dip galvanized and ensuring durability and trouble-free use for years
- Gate release levers on both sides of the gate
- Designed to be installed on a curb
